NARVA Energy Saver ... Light with saving effect.

By using of NARVA fluorescent lamps T8 of the series Energy Saver there is possible to save 10% and more of energy costs without any changes at the luminaries and without noticeable changing of the illumination level.

Simply changing of the nagged lamps into corresponding lamps of the NARVA Energy Saving series – ready!

Favoured areas of use are existing installations with luminaries with magnetic ballast.

The largest energy saving you get at a room temperature of 20°C and higher and an ambient temperature for the lamp of not less than 30°C. Fluorescent lamps of the Energy Saver series are available on request with other light colours to.
